

Har bir asosiy funktsiya uchun — alohida page, alohida vizual screen va aniq talablar.

1-bosqich: Android + Uzbek/Russian. 2-bosqich: iOS + English. Core payments: Click, Payme, Uzum, Visa, Mastercard.

Design: dark luxury + cinematic + neon purple/magenta + gold/cyan accents. Figma — final source of truth.

Ishga tushirish ekrani: logo, premium identika, loading va first-launch routing.

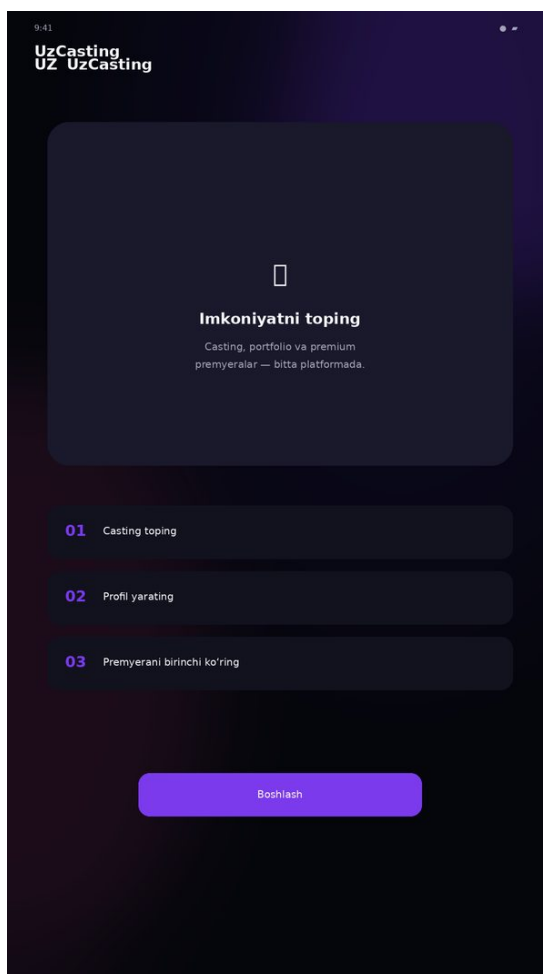

Developer uchun aniq detallar:

- Logo + launch animation
- Premium dark background
- Loading/routing
- First-launch onboarding

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

3–4 qadamda platforma qiymati: casting, portfolio, premyera va creator daromadi.

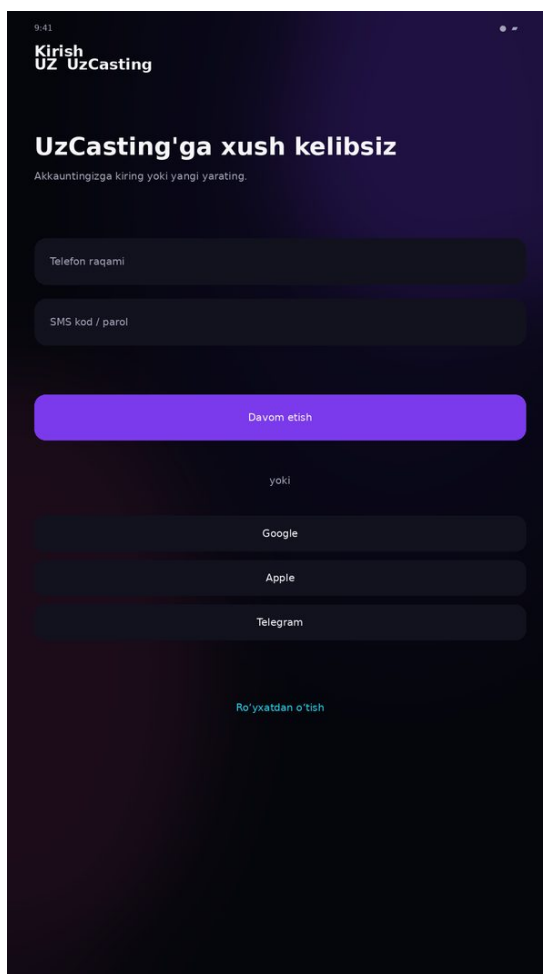

Developer uchun aniq detallar:

- 3–4 slides
- Skip + Boshlash
- Casting / portfolio / premiere / monetization value proposition

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Telefon + OTP, parol, til tanlash, shartlarga rozilik.

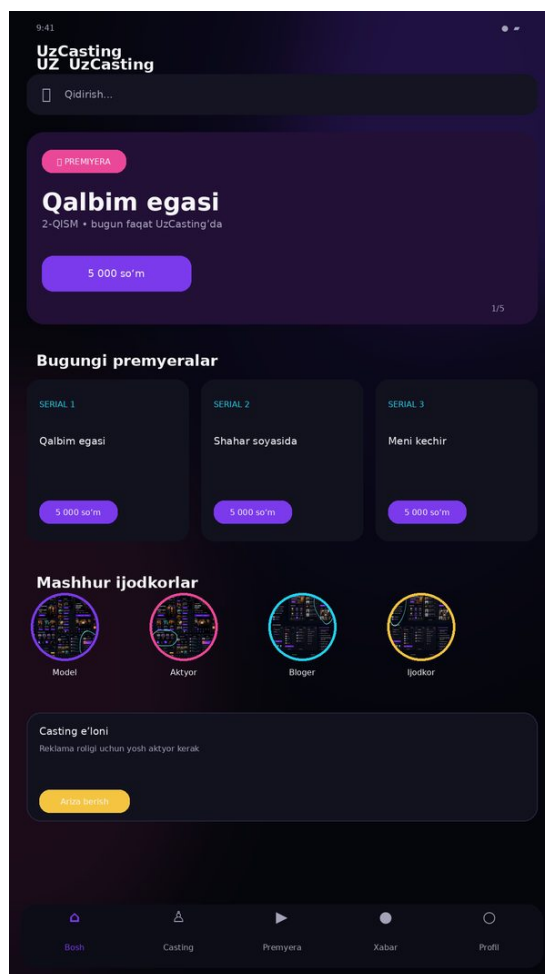

Developer uchun aniq detallar:

- Phone + OTP
- Password/PIN states
- Google / Apple / Telegram optional
- UZ/RU language

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Premyera, mashhur ijodkorlar, casting va premium CTA — asosiy feed.

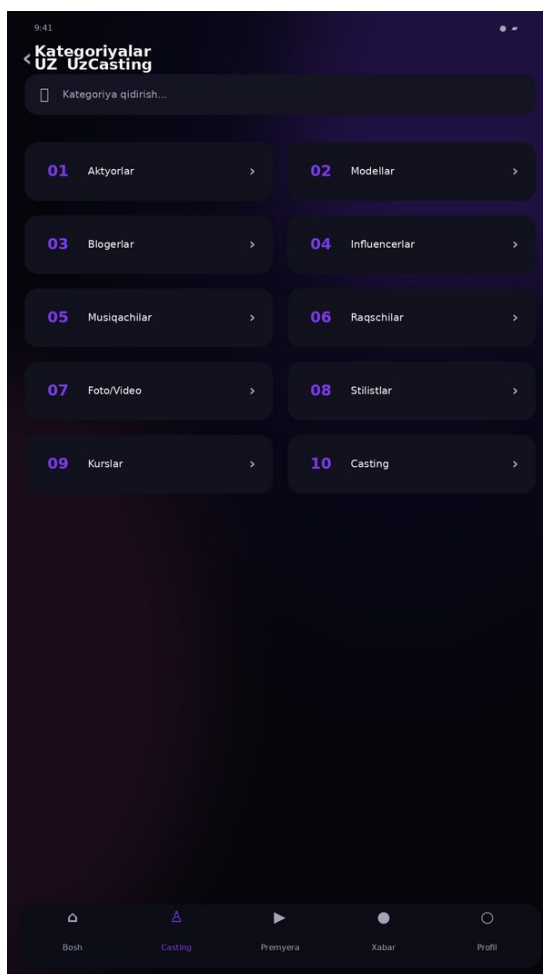

Developer uchun aniq detallar:

- Hero premiere carousel
- Today's premieres
- Popular creators: actor/model/blogger/influencer
- Casting feed
- Premium CTA
- Search + smart filter

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

10 yoʻnalishning barchasi alohida va tez kiriladigan card koʻrinishida.

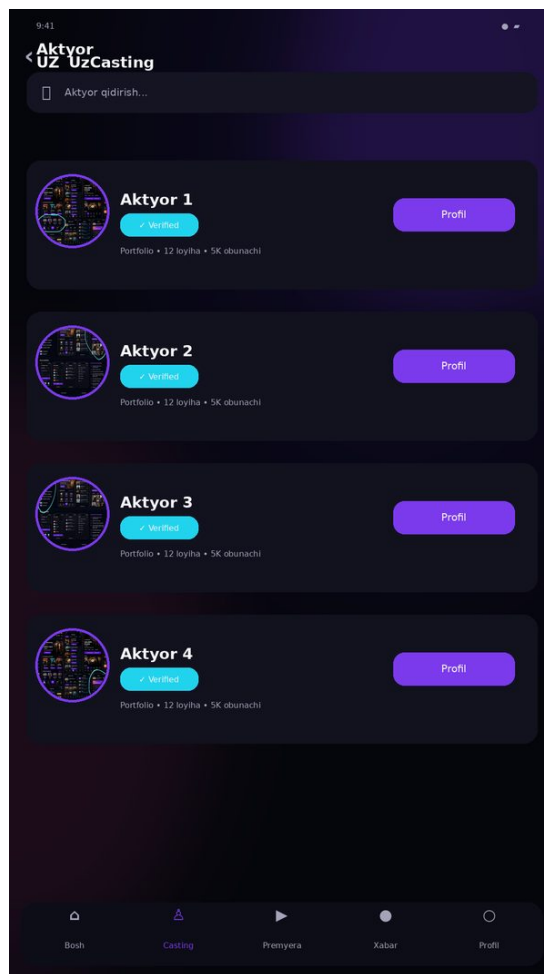

Developer uchun aniq detallar:

- 10 categories
- Fast navigation
- Category-specific feed
- Bottom navigation

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Aktyorlar: foto, verified, portfolio, loyiha va profilga o'tish.

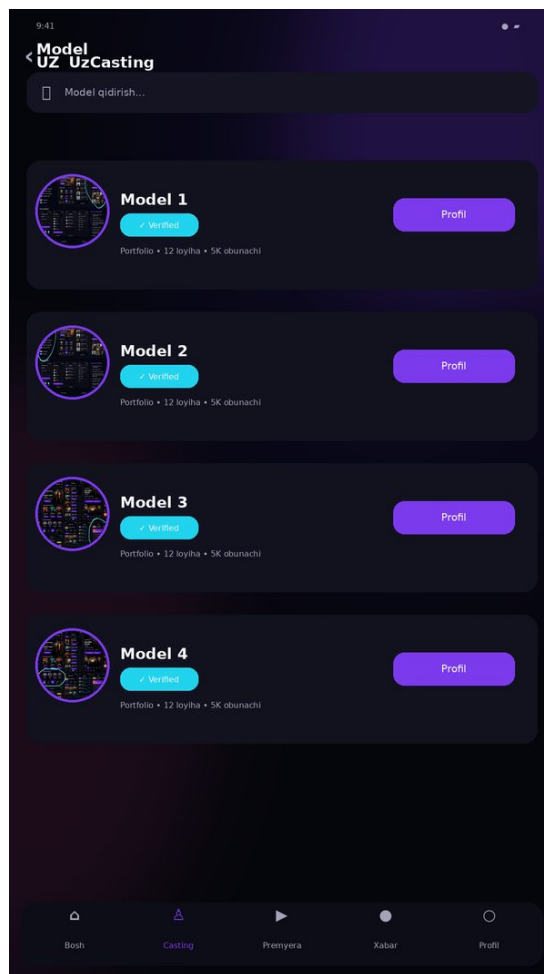

Developer uchun aniq detallar:

- Actor card
- Verified badge
- Portfolio
- Projects / followers / views
- Profile CTA

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Modellar: fashion/beauty portfolio, filter va professional profile.

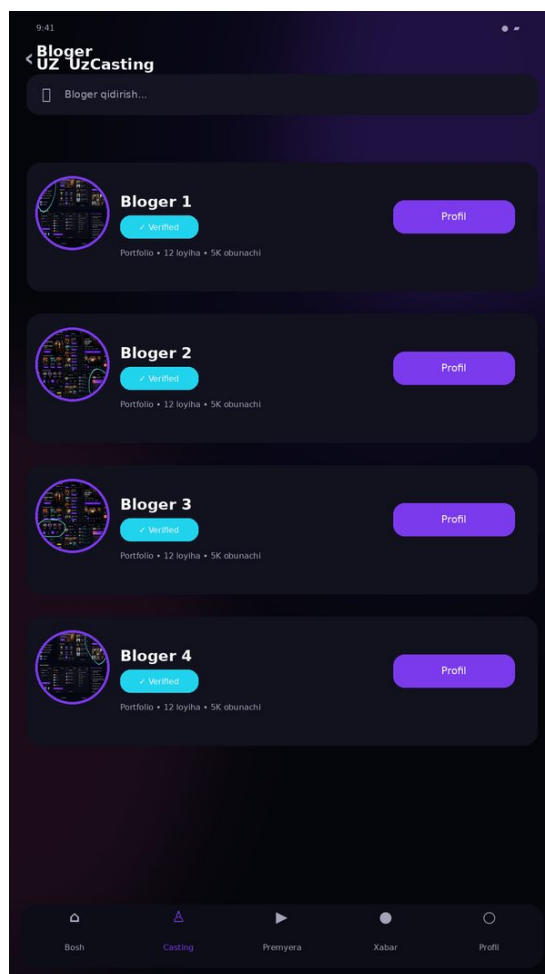

Developer uchun aniq detallar:

- Model card
- Fashion/beauty portfolio
- Verified badge
- Filter + profile CTA

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Blogerlar: audience, followers, content va creator monetization yoʻnalishi.

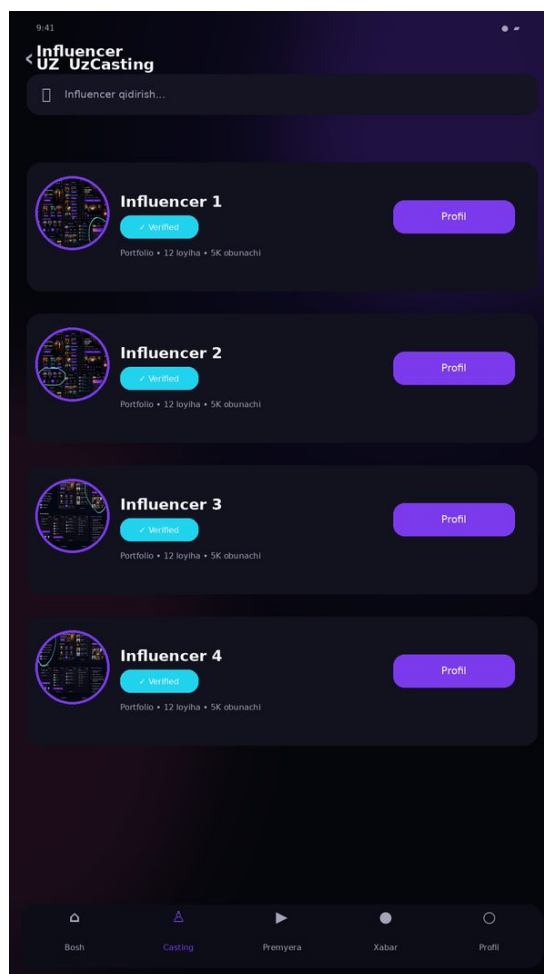

Developer uchun aniq detallar:

- Creator stats
- Followers / views
- Content portfolio
- Monetization-ready profile

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Influencerlar: verified badge, reach, category va portfolio.

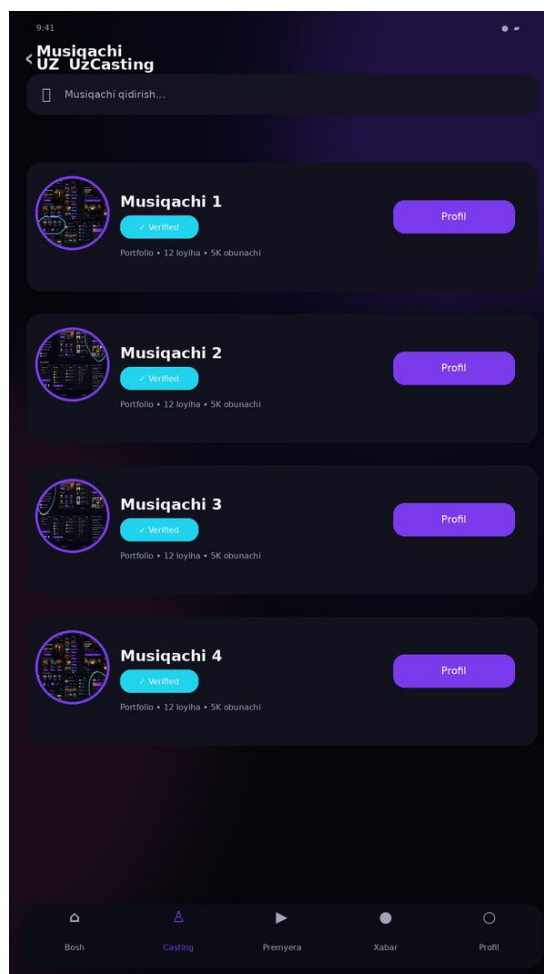

Developer uchun aniq detallar:

- Verified badge
- Audience/reach
- Category
- Brand/collaboration readiness

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Musiqachilar: media, loyiha va hamkorlik uchun professional card.

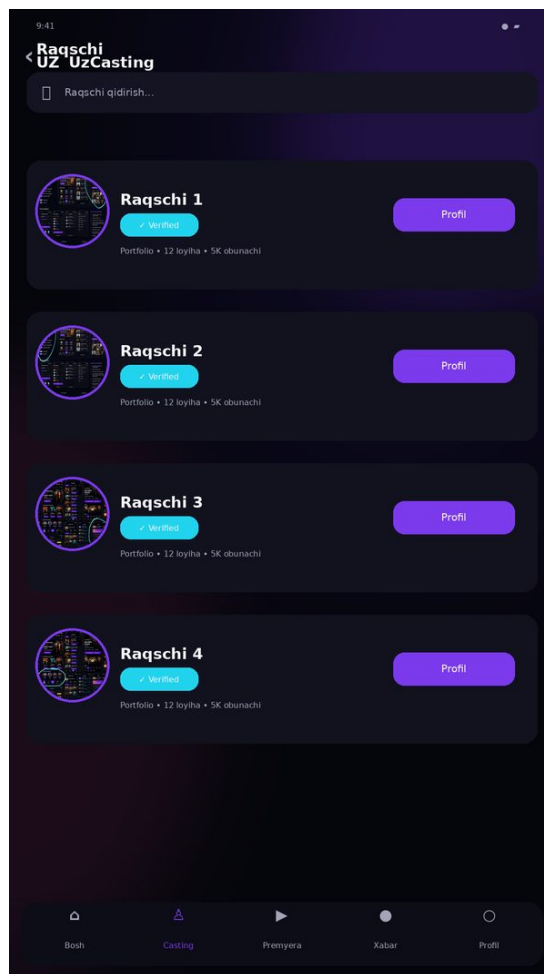

Developer uchun aniq detallar:

- Music/media portfolio
- Projects
- Collaboration CTA

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Raqschilar: video portfolio, style va castingga tez ariza.

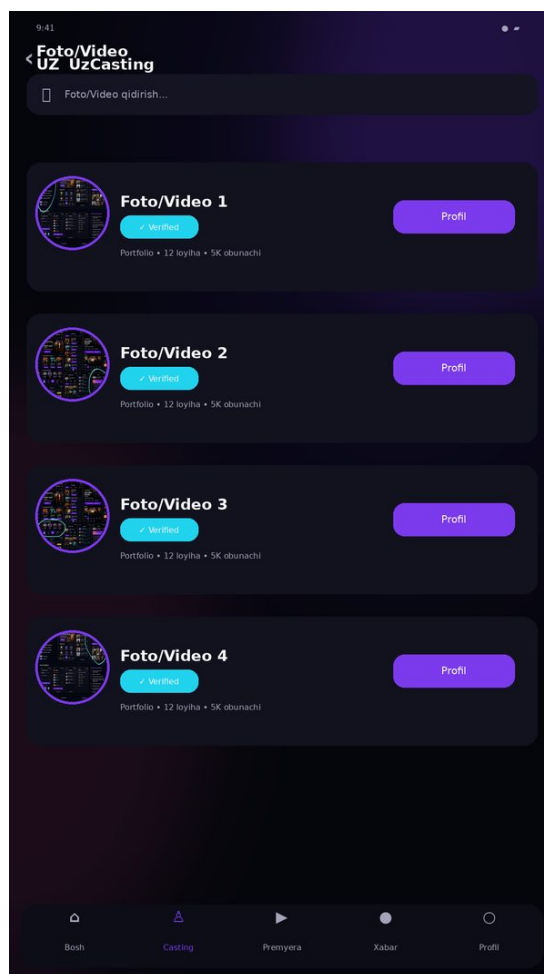

Developer uchun aniq detallar:

- Video-first portfolio
- Style/category
- Casting CTA

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Operator, fotograf va production ijodkorlari uchun portfolio katalogi.

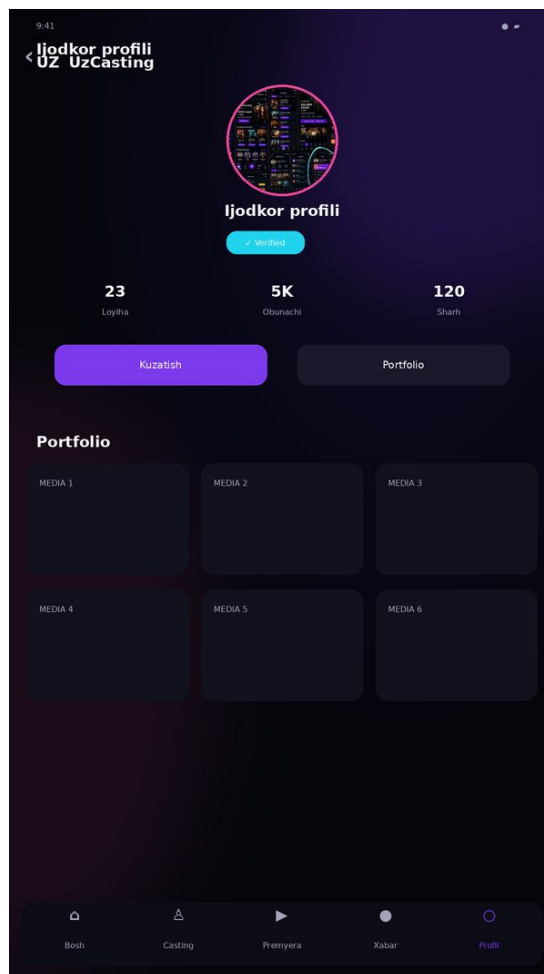

Developer uchun aniq detallar:

- Portfolio grid
- Production skills
- Project history
- Contact/collaboration

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Bitta ijodkorning to'liq professional portfolio va statistikasi.

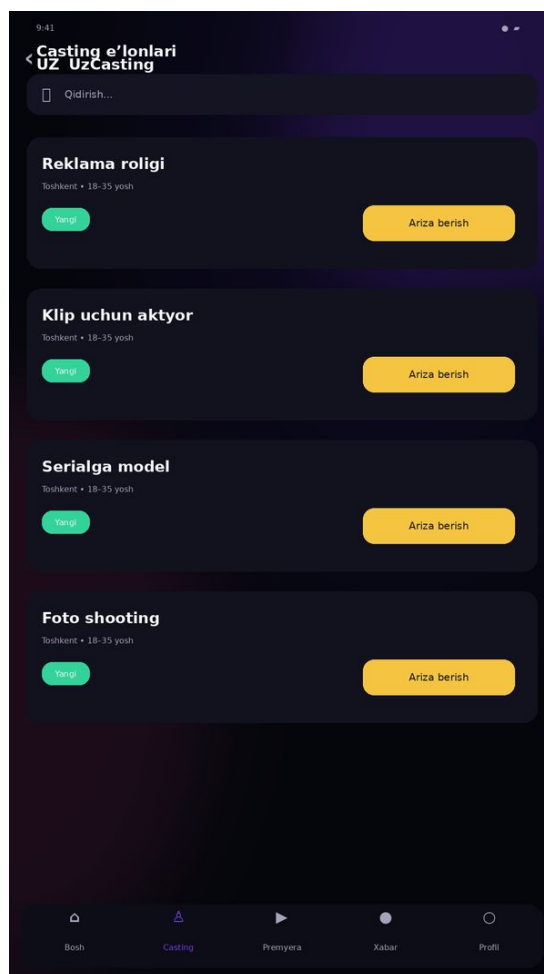

Developer uchun aniq detallar:

- Avatar + verified
- Bio + location + category
- Portfolio grid
- Videos
- Statistics
- Follow/contact

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Yangi castinglar, filter, deadline va ariza berish CTA.

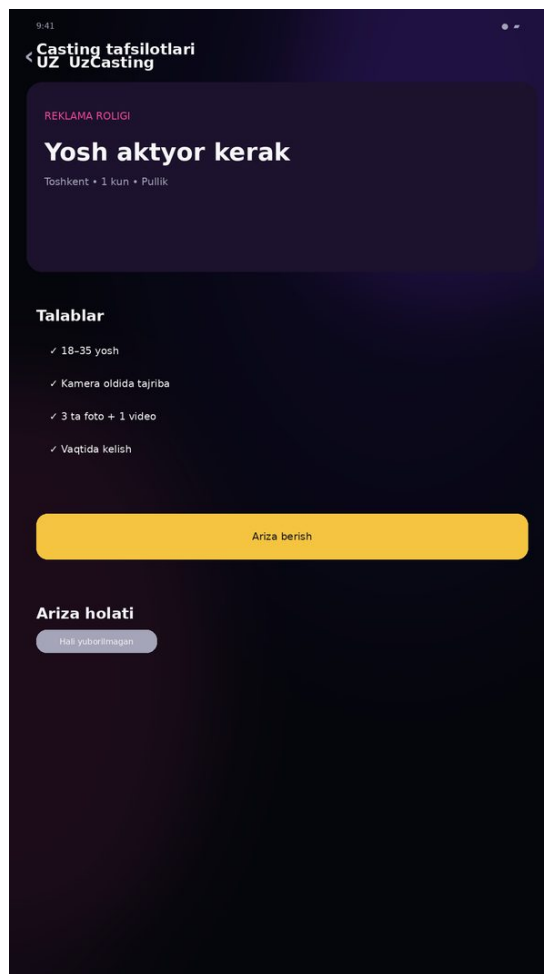

Developer uchun aniq detallar:

- Search
- Location/category filters
- Deadline
- Paid/Unpaid
- Save
- Apply

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Rol, talablar, joy, sana, to'lov va ariza statusi batafsil.

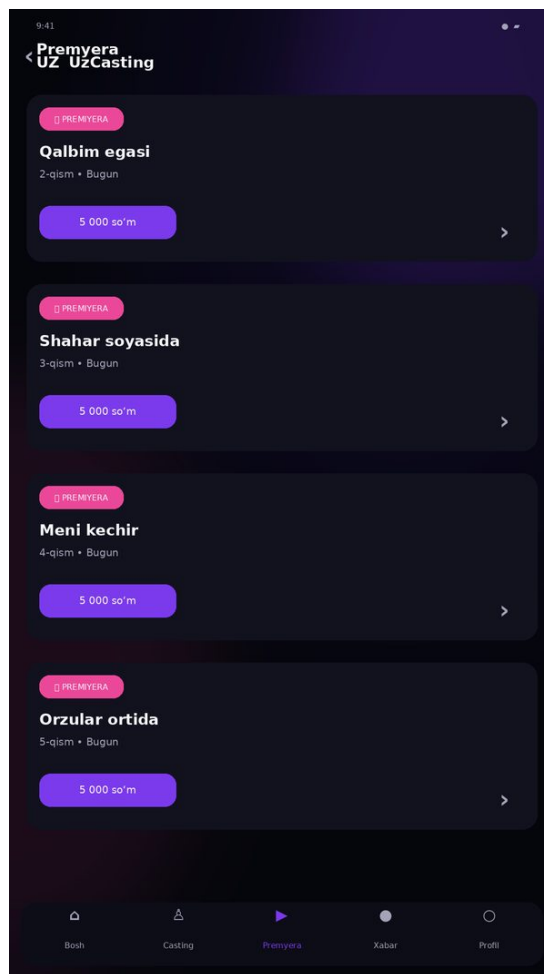

Developer uchun aniq detallar:

- Role description
- Requirements
- Date/location
- Payment
- Media upload
- Application status

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Seriallar, ko'rsatuvlar, filmlar va eksklyuziv episode'lar.

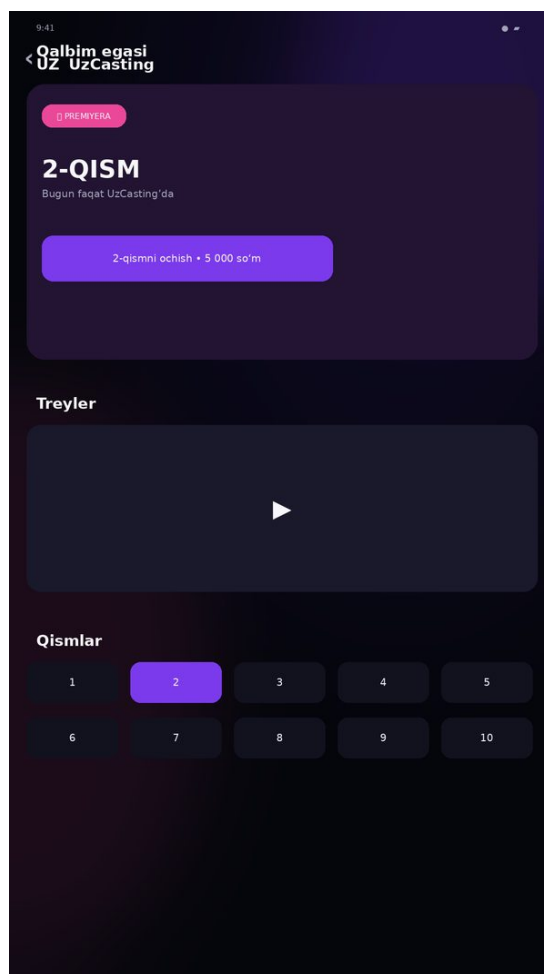

Developer uchun aniq detallar:

- Series/show/movie tabs
- Premiere badge
- Price
- Exclusive status
- Trailer
- Episode list

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Trailer, locked episode, 5 000 so'm CTA va qismlar ro'yxati.

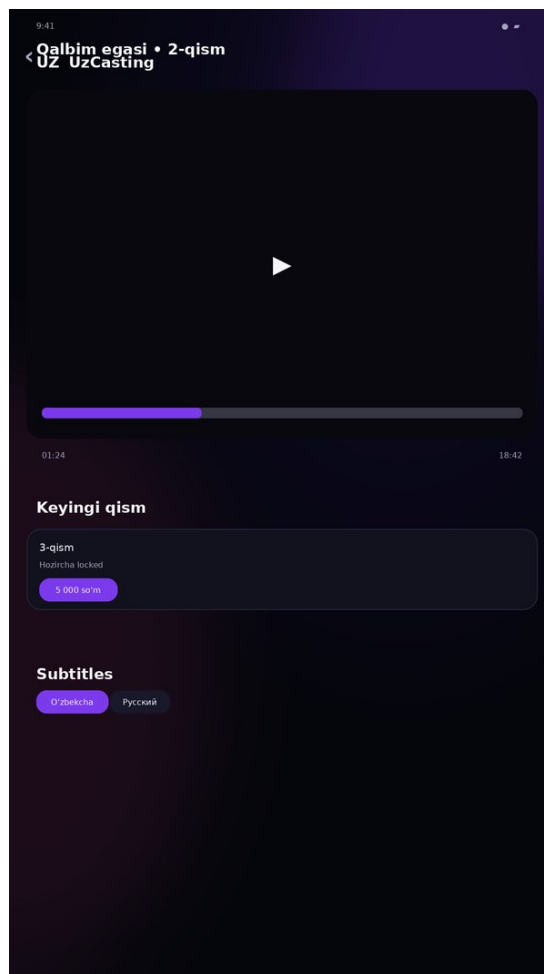

Developer uchun aniq detallar:

- Cinematic cover
- Trailer
- Locked/unlocked states
- 5 000 so'm CTA
- Episode navigation

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Secure streaming, quality, subtitles, progress va next episode.

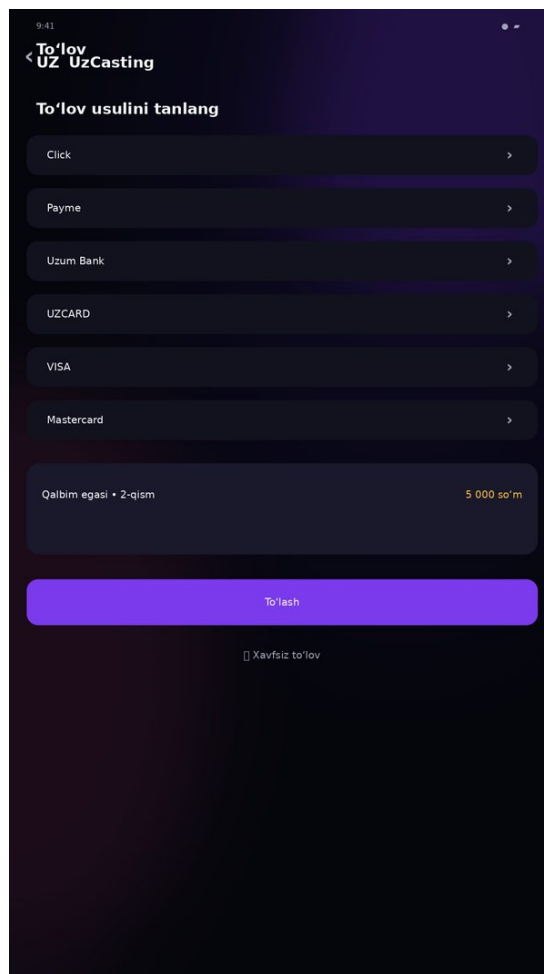

Developer uchun aniq detallar:

- Secure playback
- Quality
- Subtitles
- Progress
- Continue watching
- Next episode

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Click, Payme, Uzum Bank, UZCARD, Visa, Mastercard va receipt.

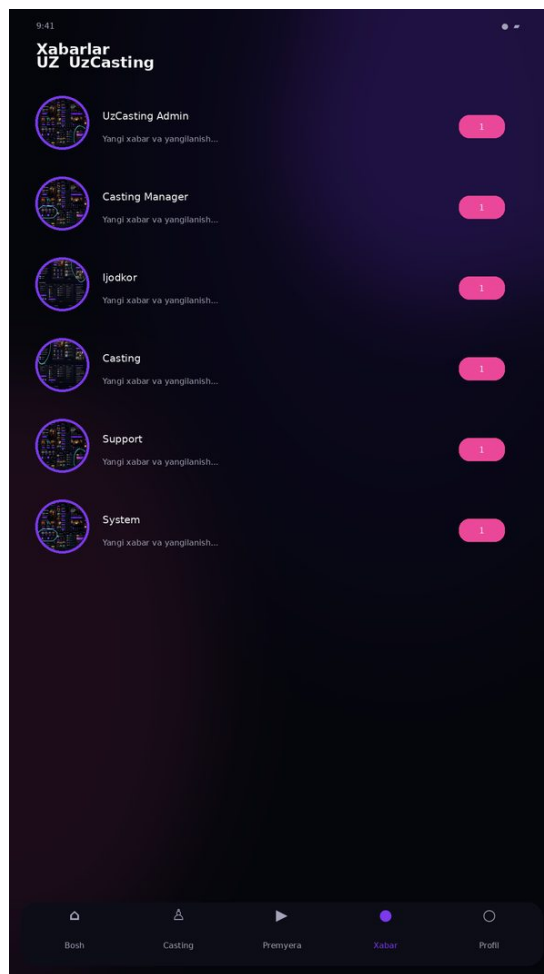

Developer uchun aniq detallar:

- Click
- Payme
- Uzum Bank
- UZCARD
- Visa
- Mastercard
- Success/failure
- Receipt

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Creator, casting manager va system xabarlari, unread badge.

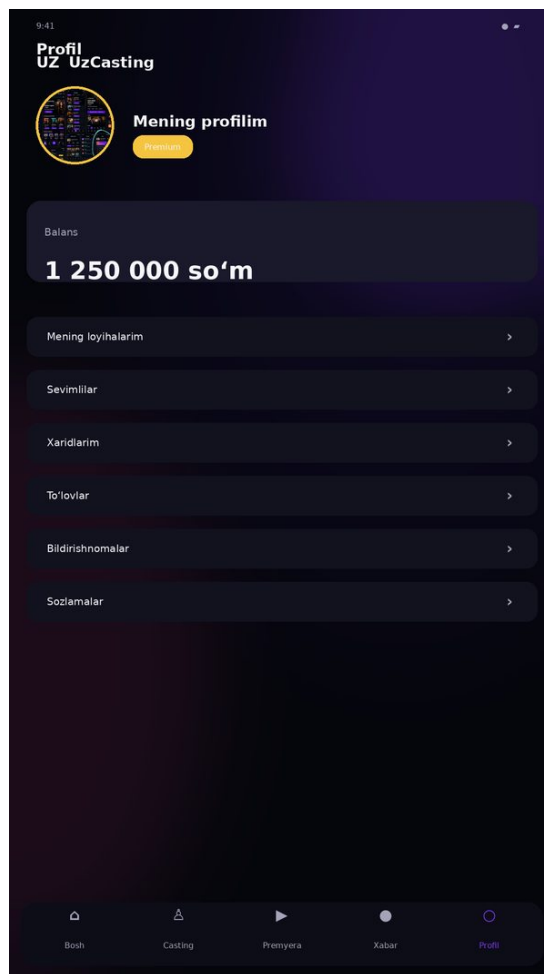

Developer uchun aniq detallar:

- Chats
- Unread count
- System messages
- Casting updates
- Creator responses
- Push deep-link

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Balans, xaridlar, loyihalar, sevimlilar va sozlamalar.

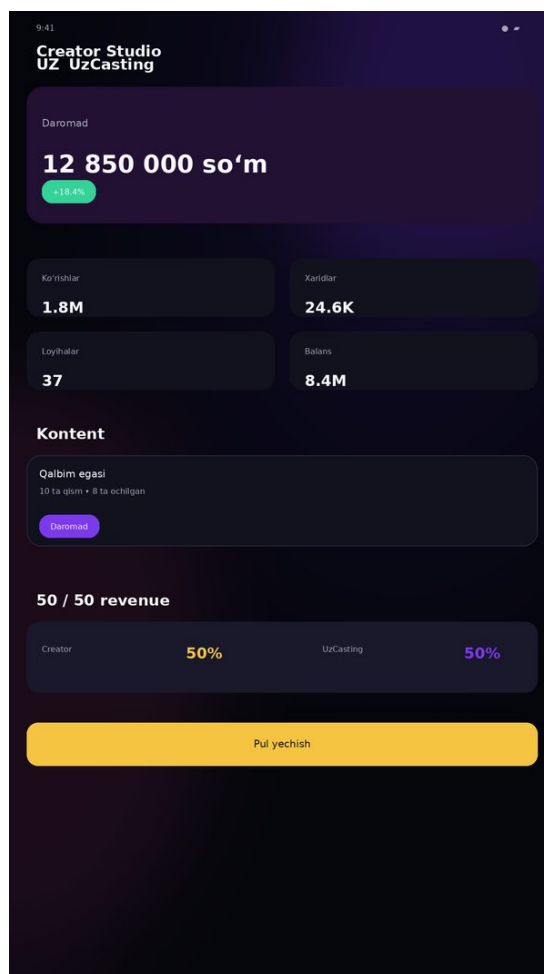

Developer uchun aniq detallar:

- Balance
- Purchases
- Projects
- Favorites
- Payments
- Settings

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Ko'rishlar, xaridlar, daromad, kontent va 50/50 hisoboti.

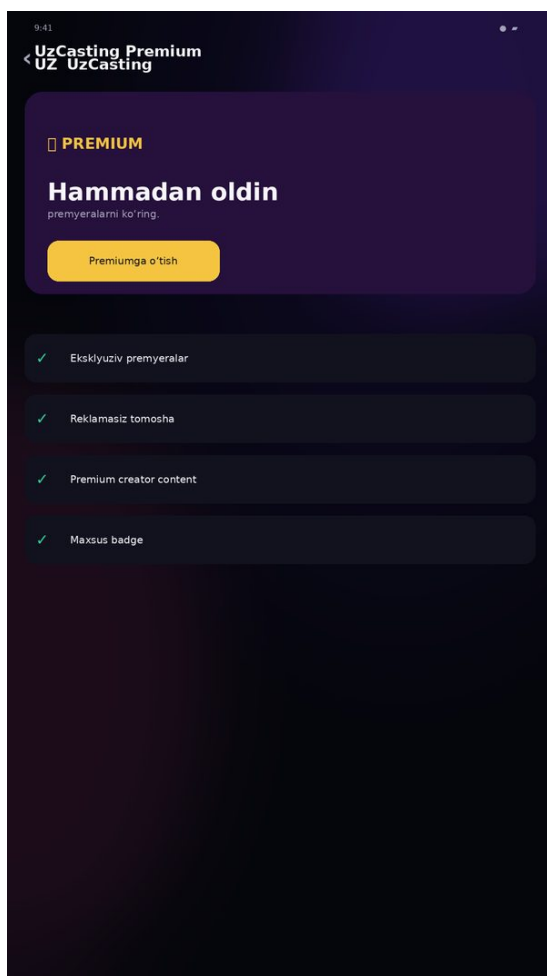

Developer uchun aniq detallar:

- Views
- Purchases
- Revenue
- Content
- 50/50 split
- Available balance
- Withdraw

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Eksklyuziv premyeralar, premium benefits va obuna CTA.

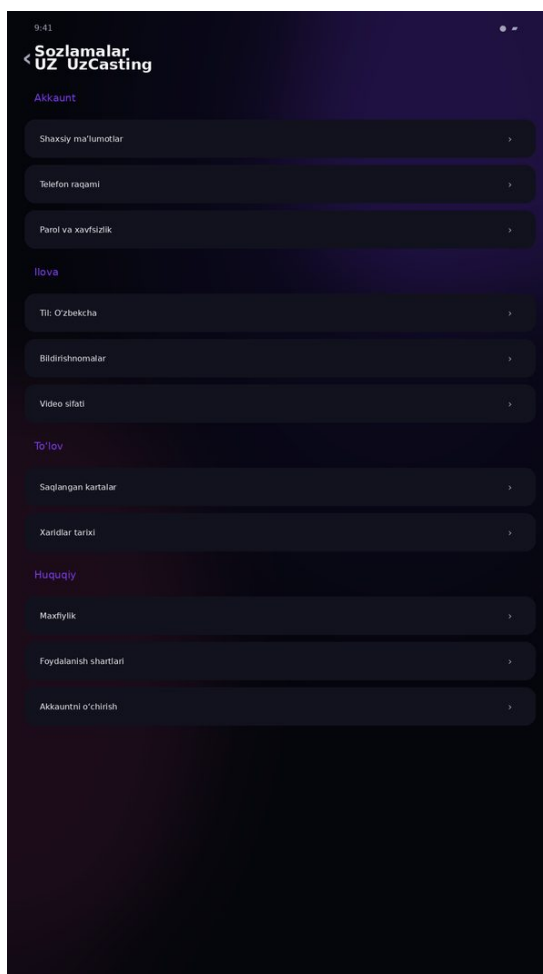

Developer uchun aniq detallar:

- Exclusive premieres
- Premium benefits
- Subscription plan
- Upgrade CTA
- Purchase history

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Account, security, til, notifications, payments va privacy.

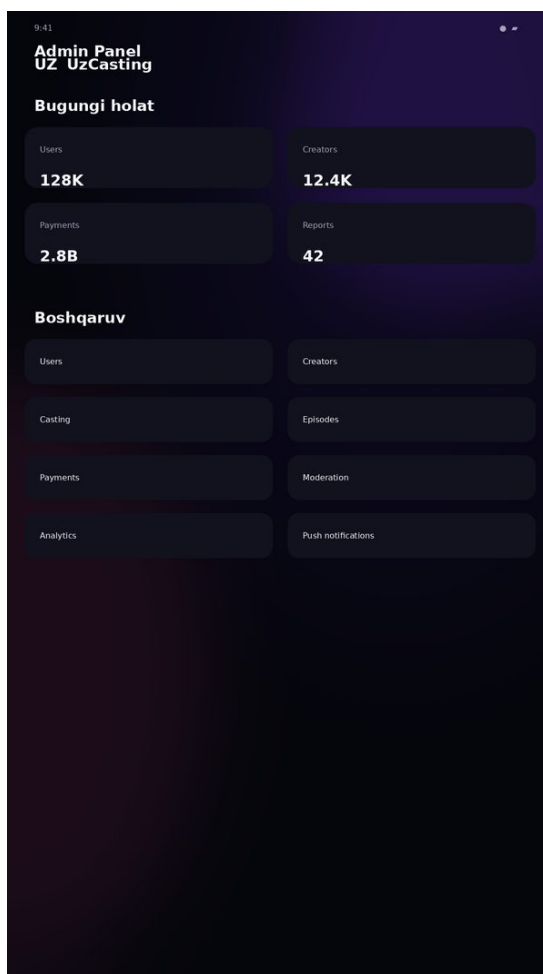

Developer uchun aniq detallar:

- Account
- Security
- Language
- Notifications
- Payments
- Privacy
- Delete account

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Users, creators, casting, episodes, payments, moderation va analytics.

Developer uchun aniq detallar:

- Users
- Creators
- Casting
- Episodes
- Payments
- Moderation
- Analytics
- Push notifications

Majburiy UI states: loading • empty • error • success • locked • purchased • disabled • offline.

Tomoshabin: Home → Premyera → Episode → To'lov → Success → Player → Keyingi qism.

Ijodkor: Profil → Creator Studio → Upload → Moderation → Publish → Sales → Revenue → Withdraw.

Aktyor/model: Kategoriya → Casting → Detail → Ariza → Portfolio → Status.

Admin: Login → Dashboard → Moderation → Payments → Users → Analytics.

Security: role-based access, token/session security, payment verification, purchase entitlement, private media access va audit logs.

Instagram/YouTube'da 1-qism bepul → CTA → UzCasting'da keyingi qism 5 000 so'm → payment verified → entitlement → secure player. Revenue share shartnomadagi ulush bo'yicha.

Figma final source of truth. Components, typography, spacing, color tokens, icons, image ratios, states, prototype va developer handoff beriladi. Android/iOS farqlari ko'rsatiladi.

Mahsulot konsepsiyasi, UX/UI yo'nalishi, screen logic, user-flow, texnik topshiriq, monetization va microcopy ishlab chiqishda ChatGPT product/design copilot sifatida ishlatiladi. Final code, security, payment integration, legal terms va store compliance developer/team tomonidan tekshiriladi.

Avval Figma'da barcha screenlar pixel-perfect tayyorlanadi. Keyin API/database contract tasdiqlanadi. Shundan so'ng Android/iOS development boshlanadi. Har bir asosiy detal uchun alohida screen va barcha holatlar ko'rsatiladi.
