Визуал reference: dark luxury UI, cinematic imagery, rounded cards, strong CTA, neon accents.

16. PREMIUM PREMYERA — БИЗНЕС МОДЕЛ

Сценарий: блогер 1-қисмни YouTube/Instagram'да бепул чиқаради. Видео охирида аудиторияни UzCasting'га чақириб, кейинги қисмни ҳаммадан олдин 5 000 сўмга кўришни таклиф қилади.

1	YouTube / Instagram	1-қисм — бепул
2	CTA	“Davomini UzCasting'da 5 000 so'mga ko'ring”
3	UzCasting	2-қисм — биринчи премьера
4	Payment	Click / Payme / Uzum / Visa / Mastercard
5	Revenue	Шартнома бўйича creator + platform share

Муҳим: контент ҳуқуқи, эксклюзивлик муддати, YouTube'га қачон чиқиши, refund ва revenue share шартномада аниқ белгиланади.

17. PREMIUM DESIGN SYSTEM

Визуал йўналиш: Netflix/creator-economy даражасидаги cinematic dark UI, лекин UzCasting'нинг ўз purple identity'си билан.

Ранглар

Deep Black	#07070D	Фон
Midnight	#11111F	Карточка
Neon Purple	#7C3AED	Асосий СТА
Magenta	#EC4899	Premium / highlight
Electric Cyan	#22D3EE	Info / secondary
Gold	#F5C542	Premium / verified
White	#FFFFFF	Асосий матн

UI қоидалари: 8–16px spacing system; 14–22px card radius; 44px+ touch target; СТА ҳар экранда битта асосий; typography hierarchy; image quality minimum 1080px; dark mode биринчи ўринда.

Premium ҳис: glow эффектлар меъёрда, ортиқча gradient эмас; контент расмлари катта; нарх ва locked status бир қарашда кўринади.

18. NAVIGATION + ROLE SYSTEM

User: Home / Casting / Premyera / Xabarlar / Profil.

Creator: юқоридагига қўшимча Creator Dashboard, Upload, Revenue, Withdraw.

Admin: web admin panel орқали users, creators, castings, episodes, payments, moderation, reports ва analytics.

19. BACKEND / API

Authentication, roles, profiles, portfolio, casting, applications, video metadata, streaming access, payment transactions, premium subscriptions, revenue ledger, notifications, reports ва moderation учун API архитектураси керак.

Видео контентни тўғридан-тўғри public file сифатида бериш эмас, access-controlled streaming ва CDN архитектураси билан ишлаш тавсия этилади.

20. ИШЛАБ ЧИҚИШ БОСҚИЧЛАРИ

1-босқич: Android + Uzbek/Russian. Core casting, profiles, payments, messaging, premieres ва асосий backend.

2-босқич: iOS + English + advanced monetization/content modules.

Дизайн жараёни: Research → Information Architecture → Wireframe → High-fidelity Figma → Prototype → Developer handoff → QA → Store release.

21. DEVELOPER HANDOFF

Figma final source of truth бўлади. Ҳар бир screen учун states: loading, empty, error, success, locked, purchased, offline белгиланади. Components, typography, spacing, colors, icons ва responsive behavior developer'га берилади.

22. QA CHECKLIST

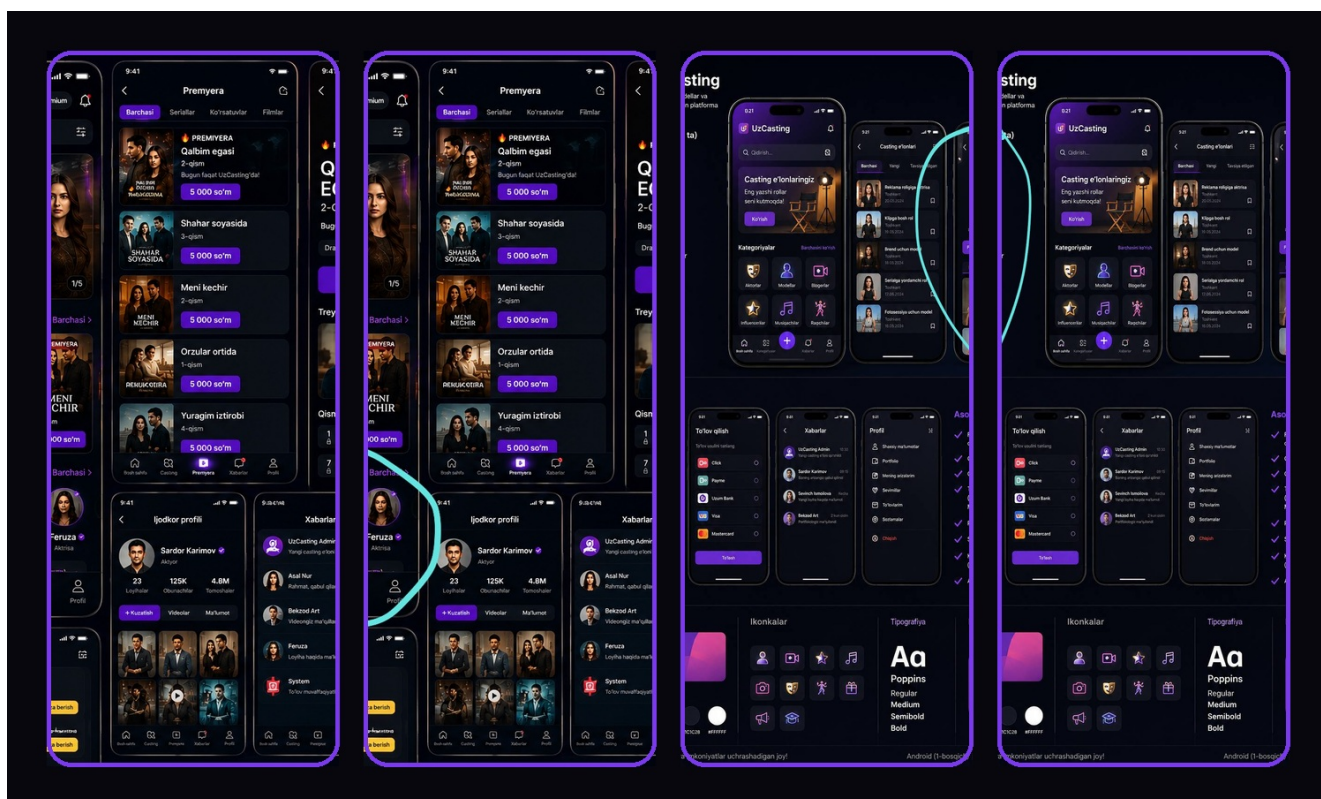

Login/OTP • casting filters • application flow • video playback • locked episode • payment success/failure • duplicate purchase protection • balance/revenue • notifications • language switch • Android/iOS device testing • performance • security.

23. CHATGPT БИЛАН ҲАМКОРЛИК

Лойиҳанинг концепцияси, UX/UI йўналиши, экранлар логикаси, user-flow, техник топшириқ матни, monetization сценарийлари, microcopy ва маҳсулот қарорларини ишлаб чиқишда ChatGPT ёрдамчи сифатида фойдаланилади.

ChatGPT — product/design copilot. Final code, architecture, security, payment integrations, legal documents ва store compliance developer/team томонидан текширилиб тасдиқланади.

Ижодкорлар учун — касб, контент ва имкониятлар бир жойда.
